

## Plastic Layer Pads

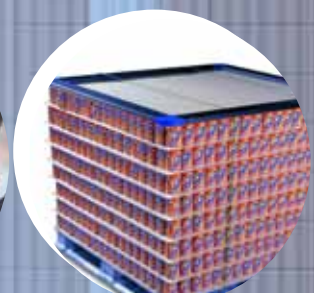

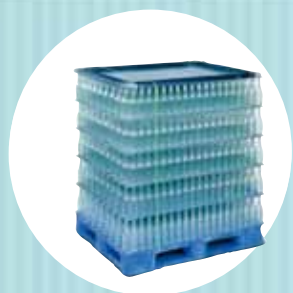

### the Perfect Solution for the Palettisation of Beverage bottles

#### Our expertise in beverage layer pads

- Presence on the market for over 30 years in over 20 countries worldwide
- 60 bottle producers in Europe, Africa, Central America, Oceania
- Technical specifications and products approved by key market actors such as worldwide leaders in bottle producers and fulfillers
- Specific production equipment designed for bottle layer pads (die cutting, welding, printing)
- Applications: plastic layer pads used for glass bottles and beverage cans

#### Advantages

- **Hygienic**
  - Easy to clean
  - No contamination from cardboard or wood particles
- **Productivity**
  - Flatness and rigidity of the layer pads help to increase speed for bottle depalettisation
- **Economical**
  - Multiuse solution: longer life-span, very low damage rate per trip, improvement of the stacking efficiency
  - Solid and longlasting twinwall sheet PP: until 50 trips
- **Designed for beverage industry**
  - Rigidity of the sheet: no necessity to use trays
  - Flexibility: available in different colours and sizes, with shaped corners or rounded edges
  - Printable: means of brand communication...
- **Ecological**
  - No environmental impact as damaged pads are recycled
  - Helps to reduce waste and spoilage

# Technical Characteristics
